To Greene County/General Subject Abandoned drums  
From Charles L. Kroeger, SRO Date November 2, 1987

NOV 4 1987

On October 27, 1987, I met with Mr. Dave Williams of Lloyd/Williams Construction Company regarding the abandoned drums on the loading dock at 521 N. Boonville. The Lloyd/Williams company recently purchased the property and were requested by Mo. DNR to properly dispose of the material. Mr. Steve Short, Springfield Sanitary Services, had brought it to our attention.

Mr. Williams indicated he would contact the company that occupied the building several years ago to determine if they had a use for the sulfuric acid. They apparently used the acid for regenerating batteries and may still be doing such. If they do not want it Mr. Williams will contact other battery facilities in an attempt to find a use for the three 30-gallon drums.

Mr. Williams also indicated he would contact S.W. Oil to have them remove the three drums of waste oil.

Re: 521 North Boonville

This office worked on a request received thru David Speak of waste stored on the back loading dock of the old Clarklift Building at 521 North Boonville. On October 13 I checked the pH of one of the carboys and determined it to be 1.0 s.u's. Also, the L.E.L.'s of two of what appeared to be used oil drums were in the < 5 % range. At the conclusion of testing I informed the renters who were starting to move equipment into the building to not dispose of the wastes on the loading dock as it appeared to be hazardous waste. I contacted Chuck Kroeger, Mo. D.N.R., informed him of the situation, and he told me he would call the Central Office and call us back. On October 16 I called Chuck for an update. I volunteered to find out who the property owner was for Chuck. It appears as of October 16, the owner is Loyd-Williams Construction Company, 725-7171. The former owner Larry Herndon, U.M.S., on East Chestnut Expressway, was contacted by phone and said effective October 16, the building was sold. He stated the waste was there when they purchased the property from Clarklift of Southwest Mo. The President of Clarklift was Ed. S. Mullane, 1754 East Lakewood. All information was offered to Chuck by phone. Mo. D.N.R. will handle the situation.

Attention: Mr. Stephen Short  
Water Pollution Control Inspector II  
Surveillance & Enforcement

Dear Mr. Short:

As of this date we have discontinued the outside wash operation.  
In the future, the equipment will be washed in the washroom where  
you indicated we have the proper equipment to handle the waste.

We thank you for your help in clearing up this matter.

Very truly yours,  
OLIVER HANDLING, INC.

Mr. Bill Oliver, President  
Oliver Handling, Inc.  
521 Boonville Avenue  
Springfield, Missouri 65806

Dear Mr. Oliver:

I would like to thank you for the courtesy extended this office during the recent visit to your business. Due to the prompt action taken by your company, it appears no oil left your property from the failure of a truck hydraulic line.

During the conversation your company was advised that the discharge from the outside wash operation is an apparent violation of City, State, and Federal Law and should be directed to the sanitary sewer.

If you desire to continue the outside operation, the attachment of this area incorporating an appropriate oil separator to the sanitary sewer should be a satisfactory alternative to the present system. Please keep in mind the elimination of storm water from this outside cleaning area should be incorporated into the design of the new system.

This office would advise you to cease discharge immediately until proper disposal of the discharge can be attained.

Please contact the Department of Building Regulations at City Hall to determine what permits are necessary to implement the required changes.

Please contact this office as to what steps you plan to take in correcting the problem stated above. If you have any questions or need further assistance, please do not hesitate to call.

Yours truly,

Stephen Short  
Water Pollution Control Inspector II
